

Kevin Langley Jr.

Senior Software Engineer · Channels & Partnerships @ 1Password

Gainesville, FL | kevinlangleyjr.dev | me@kevinlangleyjr.com | github.com/kevinlangleyjr | linkedin.com/in/kevinlangleyjr

Software engineer with over a decade of experience across security, media, non-profits, and open-source projects. I build practical solutions to real-world problems with a strong foundation in JavaScript, TypeScript, Go, and browser APIs. Currently on the Channels team at 1Password, where I help expand the platform's reach to managed service providers.

SKILLS

TypeScript · JavaScript · Go · Rust (learning) · React · Next.js · Node.js · Browser APIs · GraphQL · PostgreSQL · Ansible

EXPERIENCE

1Password, *Senior Software Engineer, Channels & Partnerships* 2022 - Present

Part of the Channels team building the MSP partner platform, working primarily in TypeScript and Go while learning Rust. We develop solutions that expand 1Password's reach to a broader customer base through managed service providers.

Human Made, *Principal Web Engineer* 2020 - 2022

Architected, built, and delivered complex projects for large media clients, and led teams of engineers through the full lifecycle of that work.

- **PlayStation.Blog.** Coordinated and led the migration to a new React-based block editor across a global team of stakeholders and engineers, in close collaboration with a publishing team accustomed to writing their own markup.
- **Snopes.com.** Headed an effort to modernize the codebase by enforcing linting rules and fixing the many hundreds of issues that were subsequently raised.

Human Made, *Senior Web Engineer* 2017 - 2020

Participated in sales engineering, translating user needs into clear deliverables and project plans. Helped the sales team close four major deals generating almost \$1M in revenue.

- **Siemens Milestones.** Led development on a server-side-rendered React front end and WordPress back end that gave Siemens employees a centralized place to discover the communications team's internal projects and how they applied to their day-to-day work.
- **Al Jazeera Arabic.** Worked alongside the client's internal team and an outside vendor to deliver a newsroom MVP powered by a React and Express front end, a GraphQL API, and a WordPress back end.
- **Artefact Group.** Responsible for the architecture and lead development of the new Artefact corporate website and blog, including adoption of the React-based editor that was in beta at the time.

Function Labs, *Lead Web Engineer*

2017 - 2020

Led development and coordinated strategic partnerships with design agencies to deliver a range of projects. Automated the entire server stack setup with Ansible and was solely responsible for the uptime of hosting services.

- **Disney Parks Blog.** Directed the architecture and engineering effort for the reimagining of the official blog from the Disney corporation.
- **Buffalo Recycles.** Partnered with the city of Buffalo, NY on a goal to increase recycling by 34% within a year, which the Buffalo Recycles website helped make a reality.
- **Visit Niagara Falls USA.** Built a marketing plan and website for a new travel agency in northern New York, integrating heavily with their in-house POS, scheduling, and booking systems.
- **The Jacobs Institute.** Partnered with the non-profit and a New York design studio to build a more modern experience for site visitors while still showcasing their content.

Voce Communications, *Lead Application Developer*

2013 - 2015

Managed a team of developers, both remote and in-office, on projects for large media and Fortune 500 companies. Developed and maintained an array of WordPress plugins with hundreds of thousands of downloads.

- ESPN MediaZone
- Big 10 Networks
- Microsoft Studios

Voce Communications, *Senior Application Developer*

2012 - 2013

Began leading development on several projects and assisted with the training and mentorship of new hires. Led development on a codebase powering over 300 local news station websites owned by Tribune Media.

- Tribune Media
- Disney Creative Inc.
- VentureBeat

Voce Communications, *Application Developer*

2011 - 2012

- Participated in a migration for ABC News spanning over 5 million news stories.
- Championed the sales process for Disney, resulting in an agreement worth over \$200k.

SIDE PROJECTS

Domnr — *Unified domain intelligence*

domnr.app

A single dashboard for DNS records, registrar config, uptime, and SSL expirations across every provider you touch. Built for solo founders, agencies, and ops teams.

Golang · TypeScript · React · PostgreSQL · Stripe

Slatewave — *One palette. Every tool.*

getslatewave.com

A unified theme system that brings a single carefully-tuned color contract to 31 developer tools across editor, terminal, notes, launcher, and chat.

VSCoDe · Ghostty · Obsidian · Neovim · Zed · +27 more
